

Description

Juana Mariana Vazquez immunization registry provided Evaluated History and Forecast is reconciled with the Immunization history information in the EMR.

Comments

No Comments

Pre Condition

A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR. and the response is available in the EMR for reconciliation and import.

Post Condition

Evaluated Immunization History returned from the registry is reconciled and imported into the patient record (Juana Mariana Vazquez)

Test Objectives

Request/Receive Patient Immunization Data and Identify Source: The EHR or other clinical software is able to store immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry.

Compare Public Health Immunization Registry (IIS) Immunization History to EHR Immunization History: The public health immunization registry has returned the requested immunization history for a patient. The EHR is able to display the immunization history received from the registry as well as the immunization history already present in the EHR so that a user can compare them. The EHR provides a way for the provider to view both histories, determine what is different (if anything), and update the existing EHR immunization history with new information from the public health registry if he or she chooses to do so. The system must store the new information as structured data as part of the patient's local immunization history and include the time of the update and the source of the new information.

Review Patient Immunization History: To assist with the ordering process, the EHR or other clinical software system allows a user to specify standard views of patient immunization information for each vaccine dose administration, including patient-specific data (e.g., age on dates of administration, etc.).

Support for:

Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required.

Evaluation Criteria

1. The user imports returned vaccinations as follows:

a. Vaccinations NOT imported:

hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 12/20/2011

measles, mumps, and rubella virus vaccine (CVX 03) administered 8/22/2012

poliovirus vaccine, inactivated (CVX 10) administered 2/21/2013 [known only to EMR, not available from IIS]

Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 10/15/2015 [known only to EMR, not available from IIS]

b. Vaccinations Imported:

hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 11/01/2011

hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 05/20/2012

diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 1/22/2012

diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 3/23/2012,

Including adverse reaction 31044-1 Reaction, VXC12^fever of >40.5C (105F) within 48 hours of dose
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 5/22/2012
diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 2/21/2013

Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 1/22/2012
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 3/23/2012
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 5/22/2012
Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 11/21/2012

poliovirus vaccine, inactivated (CVX 10) administered 1/22/2012
poliovirus vaccine, inactivated (CVX 10) administered 3/23/2012

pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 1/22/2012
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 3/23/2012
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 5/22/2012
pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 1/11/2013

rotavirus, live, monovalent vaccine (CVX 119) administered 1/22/2012
rotavirus, live, monovalent vaccine (CVX 119) administered 3/23/2012

Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 9/25/2012
Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 10/29/2012
Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 10/2/2013
Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 11/4/2014

hepatitis A vaccine, pediatric/adolescent dosage, 2 dose schedule (CVX 83) administered 11/23/2012
hepatitis A vaccine, pediatric/adolescent dosage, 2 dose schedule (CVX 83) administered 5/23/2013

measles, mumps, rubella virus vaccine (CVX 03) administered 11/22/2015

Varicella virus vaccine (CVX 21) administered 12/15/2013

2. The tester verifies that the Reconciled Patient Immunization History can be displayed to the user.
