CDC Immunization Project (CNI) v2

No Description

1. Initial Data Load

The initial Data load will consist of the vendor entering data during live interactive testing for 4 patients with various scenarios. The data entry will include demographic data, Immunization histories and specific conditions for each patient.

1.1. Juana Mariana Gonzales Initial Data Load

Demonstrates the ability to record pediatric demographic data, historical vaccinations, and clinical conditions for 6-year old Juana Mariana Gonzales. There are no transactions associated with this test case.

Test Story

Description

The practice site for the scenario is Shoreline Pediatrics. The EHR vendor loads demographic data and clinical history for Juana Mariana Gonzales. The data includes immunizations provided by the practice.

The vendor also enters:

??? Two vaccines administered at other sites

?? ??o an influenza vaccine given at a local pharmacy

?? ??o an inactivated polio vaccine given elsewhere and not reported to the registry - the history includes an adverse reaction (febrile seizure) 8 hours after the vaccine was administered

??? Adverse reaction to inactivated polio vaccine (febrile seizure) and the date and source of information

??? Allergy to egg albumin administered at this site (the registry has different CVX date and lot number information for this vaccine)

NOTE: the historical vaccines will be imported during the Registry query ??(e.g. from another practice)

Comments

Set-up step evaluating EMR functions for capturing and storing patient pediatric demographic data, historical immunizations, and clinical conditions. There is no transaction associated with this test step.

Pre Condition

No PreCondition

Post Condition

The EMR has recorded all of the pediatric demographic data, historical immunizations, and clinical conditions ??in the record created for Juana Mariana Gonzales?? using the test data provided.

Test Objectives

No Test Objectives

Evaluation Criteria

No evaluation criteria

Notes for Testers

No Note

1.1.1. Enter Initial Demographic Data for New Patient Juana Mariana Gonzales, 6-year old

Test Step Type: SUT MANUAL

Juana Mariana Gonzales is entered as a patient in the EMR, including all pediatric demographic information.

Test Story

|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------|-------------------------------------------|
| Description | | |
| The EHR vendor loads demographic data for Juana Mariana Gonzales. | | |
| Comments | | |
| Set-up step evaluating EMR functions for capturing and storing patient pediatric demographic data. There is no transaction associated with this test step. | | |
| Pre Condition | | |
| No PreCondition | | |
| Post Condition | | |
| The EMR has recorded all of the pediatric demographic in the record created for Juana Mariana Gonzales. | | |
| Test Objectives | | |
| Register New Patients: The system must allow a user to enter distinguishing information about patients so that providers can uniquely identify patients who have similar sounding names or other similar identifying information. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar names. EHRs or other clinical software must be able to store information to successfully match with patients in immunization registries, if the information is available. The information includes the mother's maiden name, whether the patient was part of a multiple birth, and the order of the multiple birth. This information allows the provider to correctly identify the patient and also helps assure a match when the EHR sends the patient's information to external systems such as an immunization registry. | | |
| Evaluation Criteria | | |
| Evaluation Criteria: Vendor successfully records all demographic data provided, and in particular (Mother's maiden name, multiple birth, birth order), with all required attributes indicated by [Y]: | | |
| Patient ID (previously listed as "Medicaid Number") | Vendor supplied | Y |
| Patient ID: Assigning Authority ID (i.e., owning source)/Facility Name | Shoreline Pediatrics | Y |
| Patient ID: Type (e.g., medical record number, IIS ID) | Vendor supplied | Y |
| Patient Name: First | Juana | Y |
| Patient Name: Middle | Mariana | Y |
| Patient Name: Last | Gonzales | Y |

1.1.5. Enter Adverse Reaction to the Polio Vaccine

Test Step Type: SUT_MANUAL

The EHR captures structured data regarding adverse events as part of the clinical history.

Test Story

| | | | | | | | | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|---|----------|----------------------------------------------------------------------------------------------------------------------------------|---|------------------------|-----------|---|
| Description | | | | | | | | | |
| The provider documents in the EMR the clinical history of an adverse reaction to the polio vaccine. | | | | | | | | | |
| Comments | | | | | | | | | |
| No Comments | | | | | | | | | |
| Pre Condition | | | | | | | | | |
| The EMR has recorded all of the pediatric demographic in the record created for Juana Mariana Gonzales. | | | | | | | | | |
| Post Condition | | | | | | | | | |
| The clinical history of the adverse reaction to the Polio vaccine is documented in the record created for Juana Mariana Gonzales. | | | | | | | | | |
| Test Objectives | | | | | | | | | |
| <i>Identify Adverse Event:</i> The EHR or other clinical software system enables capture of structured data regarding adverse events. | | | | | | | | | |
| Evaluation Criteria | | | | | | | | | |
| Evaluation Criteria: Vendor successfully records all demographic data provided with all required attributes indicated by [Y]: | | | | | | | | | |
| <table border="1"><tr><td>Adverse Reaction Substance/Agent</td><td>inactivated polio vaccine (e.g. Poliomyelitis vaccine adverse reaction (disorder) 293117006)</td><td>Y</td></tr><tr><td>Reaction</td><td>febrile seizure (e.g. Simple febrile seizure (finding) 432354000) VXC11^convulsions (fits, seizures) within 72 hours of dose^</td><td>Y</td></tr><tr><td>Date (of the reaction)</td><td>8/31/2014</td><td>Y</td></tr></table> | Adverse Reaction Substance/Agent | inactivated polio vaccine (e.g. Poliomyelitis vaccine adverse reaction (disorder) 293117006) | Y | Reaction | febrile seizure (e.g. Simple febrile seizure (finding) 432354000) VXC11^convulsions (fits, seizures) within 72 hours of dose^ | Y | Date (of the reaction) | 8/31/2014 | Y |

| No Note | | | | | | | | | |

1.1.6. Enter allergy to egg albumin

Test Step Type: SUT MANUAL

The EHR captures structured data regarding allergies as part of the clinical history.

Test Story

| | | | | | | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|---|------------------------------------------------------------------------|-----------|---|
| Description | | | | | | |
| The provider documents in the EMR the clinical history of an allergy to egg albumin. | | | | | | |
| Comments | | | | | | |
| No Comments | | | | | | |
| Pre Condition | | | | | | |
| The EMR has recorded all of the pediatric demographic in the record created for Juana Mariana Gonzales. | | | | | | |
| Post Condition | | | | | | |
| The clinical history of the allergy to egg albumin is documented in the record created for Juana Mariana Gonzales | | | | | | |
| Test Objectives | | | | | | |
| Supporting data for: <i>Modify Antigen Recommendations Based on Allergy History</i> : The system notifies the provider of any conflicts between recommended vaccines in the updated forecast and the patient's active allergies. | | | | | | |
| Evaluation Criteria | | | | | | |
| Evaluation Criteria: Vendor successfully records all clinical allergy data provided with all required attributes indicated by [Y]: | | | | | | |
| <table border="1"><tr><td>Allergy Substance/Agent</td><td>Egg Albumin Allergy (e.g. 213020009 Egg protein allergy (disorder), Allergy to eggs (disorder) 91930004)</td><td>Y</td></tr><tr><td>Date (allergy status known - e.g. thru testing or date of the allergy)</td><td>8/31/2014</td><td>Y</td></tr></table> | Allergy Substance/Agent | Egg Albumin Allergy (e.g. 213020009 Egg protein allergy (disorder), Allergy to eggs (disorder) 91930004) | Y | Date (allergy status known - e.g. thru testing or date of the allergy) | 8/31/2014 | Y |
| Allergy Substance/Agent | Egg Albumin Allergy (e.g. 213020009 Egg protein allergy (disorder), Allergy to eggs (disorder) 91930004) | Y | | | | |
| Date (allergy status known - e.g. thru testing or date of the allergy) | 8/31/2014 | Y | | | | |
| Notes for Testers | | | | | | |
| No Note | | | | | | |

1.2. Juan Marcel Gonzales Initial Data Load

Demonstrates the ability to record pediatric demographic data, historical vaccinations, and clinical conditions for 3 1/2-year old Juan Marcel Gonzales. There are no transactions associated with this test case.

| The EMR has recorded all of the pediatric demographic in the record created for Juan Marcel Gonzales. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Test Objectives | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>Register New Patients: The system must allow a user to enter distinguishing information about patients so that providers can uniquely identify patients who have similar sounding names or other similar identifying information. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar names. EHRs or other clinical software must be able to store information to successfully match with patients in immunization registries, if the information is available. The information includes the mother's maiden name, whether the patient was part of a multiple birth, and the order of the multiple birth. This information allows the provider to correctly identify the patient and also helps assure a match when the EHR sends the patient's information to external systems such as an immunization registry.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Evaluation Criteria | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

1.2.2. Enter Clinical History for Juan Marcel Gonzales

Test Step Type: SUT_MANUAL

The EHR captures structured data regarding a problem of Asthma as part of the clinical history.

Test Story

| | | | |
|------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|---|---------------------------------------------|
| Description | | | |
| The clinical history of Moderate Persistent Asthma is documented in the record created for Juan Marcel Gonzales. | | | |
| Comments | | | |
| No Comments | | | |
| Pre Condition | | | |
| The EMR has recorded all of the pediatric demographic in the record created for Juan Marcel Gonzales. | | | |
| Post Condition | | | |
| The clinical history of the Moderate Persistent Asthma is documented in the record created for Juan Marcel Gonzales. | | | |
| Test Objectives | | | |
| Supporting data for testing contraindications. | | | |
| Evaluation Criteria | | | |
| Evaluation Criteria: Vendor successfully records all clinical history data provided with all required attributes indicated by [Y]: | | | |
| Adverse History of Asthma | | | |
| Problems | Moderate Persistent Asthma (e.g. Moderate persistent asthma - SNOMED-CT 427295004) | Y | Coded value expected using SNOMED-CT or ICD |

1.3.1. Enter Initial Demographic Data for Mariela Gonzales Morales

Test Step Type: SUT_MANUAL

Mariela Gonzales Morales, infant twin, is entered as a new patient in the EMR, including all pediatric demographic information.

Test Story

| | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|-------------------------------------------|
| Description | | |
| The EHR vendor loads demographic data for Mariela Gonzales Morales. | | |
| Comments | | |
| Set-up step evaluating EMR functions for capturing and storing patient pediatric demographic data. There is no transaction associated with this test step. | | |
| Pre Condition | | |
| No PreCondition | | |
| Post Condition | | |
| The EMR has recorded all of the pediatric demographic in the record created for Mariela Gonzales Morales. | | |
| Test Objectives | | |
| <p>Register New Patients: The system must allow a user to enter distinguishing information about patients so that providers can uniquely identify patients who have similar sounding names or other similar identifying information. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar names. EHRs or other clinical software must be able to store information to successfully match with patients in immunization registries, if the information is available. The information includes the mother's maiden name, whether the patient was part of a multiple birth, and the order of the multiple birth. This information allows the provider to correctly identify the patient and also helps assure a match when the EHR sends the patient's information to external systems such as an immunization registry.</p> | | |
| Evaluation Criteria | | |
| Evaluation Criteria: Vendor successfully records all demographic data provided, and in particular (Mother's maiden name, multiple birth, birth order), with all required attributes indicated by [Y]: | | |

2. Juana Mariana Gonzales Visit

No Description

2.1. Query the Registry for Juana Mariana Gonzales

EMR Generates a Z44 query to the Immunization Registry to retrieve the Evaluated History and Forecast for Juana Mariana Gonzales.

Test Story

| |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description |
| Querying the registry will consist of the vendor creating Z44 messages for Juana Mariana Gonzales to be sent to the registry. The response will be processed as part of the 'Display, Reconcile, Import and Update Immunization Information' activity. |
| Comments |
| No Comments |
| Pre Condition |
| Juana Mariana Gonzales is entered as a patient in the EMR with complete Demographic data, Immunization History Data, and Clinical Data according to the steps in the 'Juana Mariana Gonzales Initial Data Load' |
| Post Condition |
| A Z44 Query is generated and submitted to the Immunization Registry/Test tool. |
| Test Objectives |
| Real Time Request/Receive Patient Immunization History: The system sends a request to the public health immunization registry "on demand" (e.g., those without scheduled appointments). The request includes the identifying information the immunization registry needs to match each patient with those in the registry including, if present, the mother's maiden name, a multiple birth indicator, and the birth order. The request also is sent in a pre-determined format the registry can read and interpret (Query Response Grammar (RSP) - HL7 version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5). |
| Evaluation Criteria |
| The vendor can produce a valid Z44 query in accordance with the test data correctly and without omission. The data in the message corresponds to the data in the EMR and contains all test data attributes supplied. |
| Notes for Testers |
| No Note |

2.1.1. Select Patient Juana Mariana Gonzales

Test Step Type: SUT MANUAL

Select patient Juana Mariana Gonzales, distinguishing the patient from other patients with similar demographics (similar names).

Test Story

| |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description Juana Mariana Gonzales is selected as the patient and her record is opened in the EMR. |
| Comments No Comments |
| Pre Condition Juana Mariana Gonzales Initial Data Load completed. |
| Post Condition Juana Mariana Gonzales is the active working patient in the EMR. |
| Test Objectives <i>Select New Patient:</i> The system must allow a user to enter distinguishing information about patients so that providers can uniquely identify patients who have similar sounding names or other similar identifying information. For example, twins living in the same household will have similar dates of birth, addresses, and may have similar names. EHRs or other clinical software must be able to store information to successfully match with patients in immunization registries, if the information is available. The information includes the mother's maiden name, whether the patient was part of a multiple birth, and the order of the multiple birth. This information allows the provider to correctly identify the patient and also helps assure a match when the EHR sends the patient's information to external systems such as an immunization registry. |
| Evaluation Criteria Tester shall verify that the product can distinguish Juana Mariana Gonzales from similar sounding names using all of the pediatric demographics: <ul style="list-style-type: none">• Patient ID (previously listed as "Medicaid Number") - Vendor supplied• Patient ID: Assigning Authority ID (i.e., owning source)/Facility Name - Shoreline Pediatrics• Patient ID: Type (e.g., medical record number, IIS ID) - Vendor supplied• Patient Name: First - Juana• Patient Name: Middle - Mariana• Patient Date of Birth - 11/01/2010• Birth Time - 11:05• Patient Gender (Administrative Sex) - F• Patient Multiple Birth Indicator - No• Patient Birth Order - NA• Responsible Person Name: First - Joanna• Responsible Person Name: Middle - Merida• Responsible Person Name: Last - Gonzales• Responsible Person Name: Relationship to Patient - Grandmother (or Grandparent)• Mother's Name: First - Maria• Mother's Name: Middle - Merida• Mother's Name: Last - Gonzales• Mother's Name: Maiden Last - Acosta• Patient Address: Street - 4345 Standish Way• Patient Address: City - Stamford• Patient Address: State - CT• Patient Address: Country - US• Patient Address: Zipcode - 06903• Patient Address: County of Residence - Fairfield• Race - White• Ethnicity - Hispanic or Latino• Birthing Facility Name (Birth Delivery Location Address BDL) - Shoreline Hospital 325 Shoreline Drive, Stamford Connecticut 06901• Patient Birth State - CT• Patient Primary Language - English• Patient Telephone Number - (203) 555-1212• Patient Telephone Number Type (e.g., home, cell) - home• Patient E-mail Address - jmg@gmail.com• Publicity Code• Protection Indicator• Protection Indicator Effective Date• Immunization Registry Status• Preferred Contact Method - Phone |

2.1.2. Query Registry for vaccination history and forecast for Juana Mariana Gonzales

Test Step Type: SUT_INITIATOR

The EMR generates a Z44 query for immunization history and forecast correctly and without omission according to supplied test data.

Test Story

| |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description |
| The provider uses the EMR to query the Immunization Registry for an Evaluated History and Forecast based on information known to the Immunization Registry. |
| Comments |
| No Comments |
| Pre Condition |
| Juana Mariana Gonzales Initial Data Load is completed. |
| Post Condition |
| The Immunization Registry responds with Evaluated Vaccine History and Forecast for Juana Mariana Gonzales |
| Test Objectives |
| <i>Real Time Request/Receive Patient Immunization History:</i> The system sends a request to the public health immunization registry “on demand” (e.g., those without scheduled appointments). The request includes the identifying information the immunization registry needs to match each patient with those in the registry including, if present, the mother’s maiden name, a multiple birth indicator, and the birth order. The request also is sent in a pre-determined format the registry can read and interpret (Query Response Grammar (RSP) – HL7 version 2.5.1 Implementation Guide for Immunization Messaging Release 1.5). |
| Evaluation Criteria |
| Tester shall verify that the vendor can produce a valid Z44 query in accordance with the test data correctly and without omission. Tester shall verify that the data in the message corresponds to the data in the EMR and contains all test data attributes supplied. |

2.2. Juana Mariana Gonzales Display Reconcile Update Immunization Information

Using the Z42 Response to Immunization Registry Query, the EMR displays the Evaluated History and Forecast to the user for reconciliation and update.

Test Story

| |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description |
| The vendor will receive information back from the registry and show the ability to view and reconcile, and import the information returned by the registry (NOTE: the Z42 message will be provided either manually, or as part of the tool). This test will also look at the system's ability to view the forecast returned by the registry, and create a new forecast after reconciling the information. |

2.2.1. View and Compare response to request for vaccination history for Juana Mariana Gonzales

Test Step Type: TA_RESPONDER

The EMR displays the Immunization History results (Z42) returned in response to the Z44 Query and compare to those in the EMR.

Test Story

Description

The Immunization Registry returns an Evaluated History and Forecast (Z42) to the EMR in response to the query for patient (Juana Mariana Gonzales). The provider reviews the immunization history from the registry and compares to the immunization history in the EMR. The provider reconciles the information from these sources, importing information known only to the registry, retaining information that is more accurately reflected in the local EMR:

The physician accesses the record for Juana Mariana Gonzales and:

- • Reconciles the EHR vaccine history with the history retrieved from the registry:
 - o Accepts new vaccines from the registry data
 - o If the EHR does not already flag the first MMRV as invalid, the provider updates the first MMRV to indicate it is “invalid” as it was given too early (as notified by the registry)
 - o Retains the local history for influenza and polio vaccines that are not included in the registry report.

Comments

No Comments

Pre Condition

A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR.

Post Condition

Evaluated Immunization History returned from the registry is reconciled and imported into the patient record (Juana Mariana Gonzales)

Test Objectives

Compare Public Health Immunization Registry (IIS) Immunization History to EHR Immunization History: The public health immunization registry has returned the requested immunization history for a patient. The EHR is able to display the immunization history received from the registry as well as the immunization history already present in the EHR so that a user can compare them. The EHR provides a way for the provider to view both histories, determine what is different (if anything), and update the existing EHR immunization history with new information from the public health registry if he or she chooses to do so. The system must store the new information as structured data as part of the patient’s local immunization history and include the time of the update and the source of the new information.

Review Patient Immunization History: To assist with the ordering process, the EHR or other clinical software system allows a user to specify standard views of patient immunization information for each vaccine dose administration, including patient-specific data (e.g., age on dates of administration, etc.).

Evaluation Criteria

1. The EMR displays the information returned from the Immunization Registry according to the Juror Document.

DISPLAY VERIFICATION

This Test Case-specific Juror Document provides a checklist for the Tester to use during certification testing for assessing the EHR technology's ability to display required core data elements from the information received in the Evaluated Immunization History and Immunization Forecast Z42 response message. Additional data from the message or from the EHR are permitted to be displayed by the EHR. Grayed-out fields in the Juror Document indicate where no data for the data element indicated were included in the Z42 message for the given Test Case.

The format of this Juror Document is for ease-of-use by the Tester and does not indicate how the EHR display must be designed.

The Evaluated Immunization History and Immunization Forecast data shown in this Juror Document are derived from the Z42 message provided with the given Test Case; equivalent data are permitted to be displayed by the EHR. The column headings are meant to convey the kind of data to be displayed; equivalent labels/column headings are permitted to be displayed by the EHR.

| Address Type | L | |
| Mother's Maiden Name | Maria Merida Acosta | |

When displayed in the EHR with the Evaluated Immunization History and Immunization Forecast, these patient demographics data may be derived from either the received immunization message or the EHR patient record. When displaying demographics from the patient record, the EHR must be able to demonstrate a linkage between the demographics in the message (primarily the patient ID in PID-3.1) and the patient record used for display to ensure that the message was associated with the appropriate patient.

2.2.2. Mark first MMR Dose as Invalid

Test Step Type: SUT_MANUAL

Identify the first MMR dose which is given too early, as invalid. If the EHR does not already flag the first MMR as invalid, the provider updates the first MMR to indicate it is ?invalid? as it was given too early (as notified by the registry).

Enter an MMR dose at 14 days prior to the current date. As the first MMR was invalid, this should be listed as the first dose.

Test Story

Description

If the EHR does not already flag the first MMR as invalid, the provider updates the first MMR to indicate it is "invalid" as it was given too early (as notified by the registry). The next MMR is entered as given 14 days prior to the test date.

Comments

No Comments

Pre Condition

Initial Data Load

Post Condition

MMR status for the first MMR dose is set to invalid. The 2nd MMR vaccination from 14 days prior to the current visit is entered into the patient record.

Test Objectives

dose validity is an important aspect of:

Record Past Immunizations: The EHR or other clinical software system allows providers to enter information about immunizations given elsewhere (e.g., by another doctor, at a public health clinic, pharmacy, etc.) with incomplete details.

Evaluation Criteria

Vendor Records 2nd historical MMR dose two weeks prior to the current test date.

Evaluation Criteria: The vendor is able to record that the first MMR vaccination dose is invalid with a reason that it was given too early, and therefore this new dose should be indicated as dose 'I'.

Evaluation Criteria: Vendor successfully records all immunization data known to the local practice as provided, with all required attributes indicated by [Y]:

| | | |
|---------------------------------------------------------|-------------------------------------------------|---|
| Vaccine from Practice HepB | | |
| Entered BY | Sandra Molina | Y |
| Ordering Provider | Frank Smith | Y |
| Entering Organization | Shoreline Pediatrics | Y |

Notes for Testers

No Note

2.2.3. View the vaccination forecast for Juana Mariana Gonzales

Test Step Type: TA_RESPONDER

Vendor can successfully display the current Immunization Forecast (vaccination names and recommended vaccination dates) as returned by the Registry (Z42).

Test Story

| |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description |
| The physician accesses the record for Juana Mariana Gonzales and: • Displays the registry forecast which includes the need for a second, valid MMRV vaccine and also the need for influenza and polio vaccines (since the registry has no information about them) |
| Comments |
| No Comments |
| Pre Condition |
| A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR. |
| Post Condition |
| Evaluated Immunization History returned from the registry is reconciled and imported into the patient record (Juana Mariana Gonzales) |
| Test Objectives |
| <i>View Immunization Forecast:</i> The system provides a view of the immunization forecast provided by the public health immunization registry (IIS). The display includes the forecast from the registry and includes recommended vaccination dates, minimum (earliest) date, ideal date, and maximum (latest) date for each vaccine included in the forecast. |
| Evaluation Criteria |
| 1. The EMR displays the information returned from the Immunization Registry according to the Juror Document. 2. Verify that All forecast vaccines and dates returned by the registry are displayed to the user. |
| Notes for Testers |
| No Note |

DISPLAY VERIFICATION

This Test Case-specific Juror Document provides a checklist for the Tester to use during certification testing for assessing the EHR technology's ability to display required core data elements from the information received in the Evaluated Immunization History and Immunization Forecast Z42 response message. Additional data from the message or from the EHR are permitted to be displayed by the EHR. Grayed-out fields in the Juror Document indicate where no data for the data element indicated were included in the Z42 message for the given Test Case.

The format of this Juror Document is for ease-of-use by the Tester and does not indicate how the EHR display must be designed.

The Evaluated Immunization History and Immunization Forecast data shown in this Juror Document are derived from the Z42 message provided with the given Test Case; equivalent data are permitted to be displayed by the EHR. The column headings are meant to convey the kind of data to be displayed; equivalent labels/column headings are permitted to be displayed by the EHR.

| Patient Information | | |
|----------------------|------------------------|----------------|
| Element Name | Data | Tester Comment |
| ID Number | 123456 | |
| Namespace ID | MYEHR | |
| ID Type | MR | |
| Patient Identifier | | |
| ID Number | 987633 | |
| Namespace ID | MYIIS | |
| ID Type | SR | |
| Name | Juana Mariana Gonzales | |
| Date of Birth | 11/01/2010 | |
| Sex | Female | |
| Address 1 | | |
| Street | 4345 Standish Way | |
| Other Designation | | |
| City | Stamford | |
| State | CT | |
| Zip Code | 06903 | |
| Country | USA | |
| Address Type | L | |
| Mother's Maiden Name | Maria Merida Acosta | |

When displayed in the EHR with the Evaluated Immunization History and Immunization Forecast, these patient demographics data may be derived from either the received immunization message or the EHR patient record. When displaying demographics from the patient record, the EHR must be able to demonstrate a linkage between the demographics in the message (primarily the patient ID in PID-3.1) and the patient record used for display to ensure that the message was associated with the appropriate patient.

2.2.4. Reconcile and import vaccinations from Evaluated History and Forecast for Juana Mariana Gonzales

Test Step Type: SUT_MANUAL

The Provider uses the EMR to compare the immunization history results (Z42) returned by the Immunization Registry in response to the Z44 Query with the immunization history in the local system, and reconcile (import/update) records.

Test Story

| |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description Juana Maria Gonzales Morales immunization registry provided Evaluated History and Forecast is reconciled with the Immunization history information in the EMR. |
| Comments No Comments |
| Pre Condition A Z44 query has been submitted to the Immunization Registry and a Z42 response is provided back to the EMR and the response is available in the EMR for reconciliation and import. |
| Post Condition Evaluated Immunization History returned from the registry is reconciled and imported into the patient record (Juana Mariana Gonzales) |
| Test Objectives <i>Request/Receive Patient Immunization Data and Identify Source:</i> The EHR or other clinical software is able to store immunization history accepted electronically from other sources (such as a public health immunization registry consistent with HL7 version 2.5.1, Implementation Guide for Immunization Messaging Release 1.5) or communicated by the patient and manually entered by the clinician. When viewing such information, the provider can determine which immunizations were administered by the practice, which were entered manually as patient-reported, and which were accepted electronically from the public health registry. |
| Evaluation Criteria 1. The user imports returned vaccinations as follows: a. Vaccinations NOT imported: hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 12/20/2010 measles, mumps, rubella, and varicella virus vaccine (CVX 94) administered 8/22/2011 VERIFY that the dose validity is marked as invalid b. Vaccinations Imported: hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 11/01/2010 hepatitis B vaccine, pediatric or pediatric/adolescent dosage (CVX 08) administered 05/20/2011 diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 1/22/2011 diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 3/23/2011 Including adverse reaction 31044-1 Reaction, VXC12*fever of >40.5C (105F) within 48 hours of dose diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 5/22/2011 diphtheria, tetanus toxoids and acellular pertussis vaccine, 5 pertussis antigens (CVX 106) administered 2/21/2012 Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 1/21/2011 Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 3/23/2011 Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 5/22/2011 Haemophilus influenzae type b vaccine, PRP-OMP conjugate (CVX 49) administered 11/21/2011 poliovirus vaccine, inactivated (CVX 10) administered 1/22/2011 poliovirus vaccine, inactivated (CVX 10) administered 3/23/2011 pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 1/22/2011 pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 3/23/2011 pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 5/22/2011 pneumococcal conjugate vaccine, 13 valent (CVX 133) administered 1/11/2012 rotavirus, live, monovalent vaccine (CVX 119) administered 1/22/2011 rotavirus, live, monovalent vaccine (CVX 119) administered 3/23/2011 Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 9/25/2011 Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 10/29/2011 Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 10/2/2012 Influenza, injectable, quadrivalent, preservative free, pediatric (CVX 161) administered 11/4/2013 hepatitis A vaccine, pediatric/adolescent dosage, 2 dose schedule (CVX 83) administered 11/23/2011 hepatitis A vaccine, pediatric/adolescent dosage, 2 dose schedule (CVX 83) administered 5/23/2012 measles, mumps, rubella virus vaccine (CVX 94) administered 11/22/2014 Varicella virus vaccine (CVX 94) administered 12/15/2012 |
| Notes for Testers No Note |

2.2.5. View the updated vaccination forecast for Juana Mariana Gonzales

Test Step Type: SUT_MANUAL

Using the reconciled vaccine history information, the EMR displays the current Immunization Forecast to the user for Juana Mariana Gonzales.

Test Story

| |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description |
| Once the vaccine history is reconciled in the EMR, the vaccine forecast is updated. |
| Comments |
| No Comments |
| Pre Condition |
| EMR Vaccine History is Reconciled with Immunization History from the IIS (previous step 'Reconcile and import vaccinations from Evaluated History and Forecast returned by the Registry for Juana Mariana Gonzales'). |
| Post Condition |
| An updated vaccine forecast based upon the reconciled vaccine history is available to the user. |
| Test Objectives |
| <i>View Reconciled Immunization Forecast:</i> The EHR or other clinical software system has the ability to re-evaluate and update the immunization forecast using a patient's newly updated immunization history, where the updated forecast results from the reconciliation of immunization data contained in the public health immunization registry with immunization data contained in the EHR. Processing the new forecast can be internal to the EHR or it can use an external forecasting service. |
| Evaluation Criteria |
| Tester verifies that the vendor can display the immunization forecast based upon the reconciled vaccination history: |
| 1. Verify that the EMR does not include in reconciled vaccine forecast: IPV due on 4/30/2011 |
| 2. Verify that the EMR includes in reconciled vaccine forecast: IPV due on 10/31/2014 MMR due on 10/31/2014 Varicella due on 10/31/2014 influenza, unspecified formulation due on 09/01/2015 |
| Notes for Testers |

2.3.1. Order IPV and view prior reaction

Test Step Type: SUT MANUAL

The provider selects to order IPV and views information about the prior febrile seizure post-IPV vaccine.

Test Story

Description

The physician accesses the record for Juana Mariana Gonzales and:

• Selects order for IPV and views information about the prior febrile seizure post-IPV vaccine

Comments

No Comments

Pre Condition

Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR.

Post Condition

IPV order entered in patient record. User notified of history of adverse reaction to IPV (febrile seizures).

Test Objectives

Notify of Previous Adverse Event: EHRs and other clinical software systems alert providers to previous adverse events for a specific patient, in order to inform clinical decision-making when providers view an existing immunization record.

Evaluation Criteria

EMR Records the following order information and Alert:

| | |
|----------------------------------------|-----------------------------------------------------------------------------|
| Entered BY | Sandra Molina |
| Ordering Provider | Frank Smith |
| Entering Organization | Shoreline Pediatrics |
| Vaccine Event information source | New immunization record (NIP001 00) |
| Value/Text for Vaccine Type | IPV (CVX 10) |
| Date/Time Vaccine Refusal was recorded | Current Date |
| Alert | Alerts user to information about the prior febrile seizure post-IPV vaccine |

Notes for Testers

No Note

2.3.2. IPV Parental Refusal

Test Step Type: SUT MANUAL

Documents mother's refusal for IPV vaccine indicating the parent decision, the reason and makes it permanent.

Test Story

Description

The mother is concerned about administering the IPV due to the prior adverse reaction, and refuses to have the child immunized for IPV. The provider documents mother's refusal for IPV vaccine indicating the parent decision, the reason and makes it permanent.

Comments

No Comments

Pre Condition

Prior Immunization History loaded and reconciled from the Immunization Registry. Order is attempted for IPV. Provider has been alerted to prior adverse reaction to IPV of febrile seizures.

Post Condition

Vaccine non-administration due to parental refusal is documented in the patient record. Deferral is permanent.

Test Objectives

Record Vaccine Administration Deferral: The EHR or other clinical software system allows a user to enter a reason or reasons why a specific immunization was not given to a patient (e.g., due to contraindication, refusal, etc.). The system also stores that information in a structured way so it can be reported and analyzed as needed.

Evaluation Criteria

EMR documents the non-administration of the IPV due to the parental refusal:

| | |
|-----------------------------------------|-------------------------------|
| Substance/Treatment Refusal Reason | Parental decision (NIP002 00) |
| Completion Status | RE |
| Date/Time Vaccine Deferral was recorded | Current Date |
| Deferral Reason | Parental decision (NIP002 00) |
| Deferral Status | Permanent |

Notes for Testers

No Note

2.3.3. Order Influenza vaccine and view allergy alert

Test Step Type: SUT MANUAL

The provider orders inactivated influenza vaccine and is notified that the patient has an allergy to egg albumin.

Test Story

Description

The provider orders inactivated influenza vaccine and is notified that the patient has an allergy to egg albumin

Comments

No Comments

Pre Condition

Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR.

Post Condition

Intranasal form of the Influenza vaccine is ordered for the patient.

Test Objectives

Modify Antigen Recommendations Based on Allergy History: The system notifies the provider of any conflicts between recommended vaccines in the updated forecast and the patient's active allergies.

Evaluation Criteria

EMR Records the following order information and Alert:

| | |
|-----------------------------------|----------------------------------------------------------------------------|
| Entered BY | Sandra Molina |
| Ordering Provider | Frank Smith |
| Entering Organization | Shoreline Pediatrics |
| Vaccine Event information source | New immunization record (NIP001 00) |
| Order Value/Text for Vaccine Type | Influenza, injectable, quadrivalent, preservative free, pediatric (CVX161) |
| Date/Time Vaccine was recorded | Current Date |
| Alert | Alerts user to information that patient has Egg Allergy |

Provider changes the order to modify the Vaccine type:

| | |
|---------------|-------------------------------------------------------------------------|
| Vaccine Type: | Influenza virus vaccine, live, attenuated, for intranasal use (CVX 111) |
|---------------|-------------------------------------------------------------------------|

Notes for Testers

No Note

2.3.4. Attempt to order Varicella Dose

Test Step Type:

The provider attempts to order a Varicella dose and is alerted that it is too soon to give a live virus following the MMR dose 14 days prior.

Test Story

| |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description |
| The provider attempts to give a Varicella dose, and is warned that it is too soon to give a live vaccine dose. |
| Comments |
| No Comments |
| Pre Condition |
| Initial Data Load completed with demographic data, vaccination history, and clinical history. Historical Vaccination reconciled and loaded into the EMR. MMR dose entered at 14 days prior to the current date. |
| Post Condition |
| The provider has been issued a warning that it is too soon to give another live virus dose. |
| Test Objectives |
| Receive Dose Not Indicated Alert for Single Vaccine Order: The EHR or other clinical software system notifies the provider in instances when there are single or combination vaccine orders that are inconsistent with the expected timing intervals included in the vaccine forecast. Inconsistencies include suggestion of different date(s) for ordering the vaccine(s) or indication the vaccine(s) is/are no longer required. |
| Evaluation Criteria |
| There should be a warning that the attempt to give a new Varicella Dose is too early - should get warning that 28 days must pass between 2 live virus vaccines if not administered at the same time due to the prior MMR vaccination 14 days earlier. |
| Notes for Testers |
| No Note |

2.3.5. Records Influenza Vaccine administration route with data validation checking

Test Step Type: SUT_MANUAL

The provider records the vaccine administration in the EMR and is prevented from incorrectly documenting vaccine route.

Test Story

| |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description |
| The nurse documents administration route for the nasal live, attenuated influenza vaccine • Is prevented from documenting "IM" for live, attenuated influenza vaccine |
| Comments |
| This step covers data quality checking as an informative aspect of vaccine administration |
| Pre Condition |
| Order is placed for nasal live, attenuated influenza vaccine. |
| Post Condition |
| The nasal live, attenuated influenza vaccination route has failed to be recorded as intramuscular in the EMR. |
| Test Objectives |
| Record Vaccine Administration: The EHR or other clinical software system records information about each vaccine administered. The EHR records this information as structured data elements, including, at a minimum: date administered, administering clinician, site of administration (e.g., left arm), immunization type, product, lot number, manufacturer, Vaccine Information Statement date, and quantity of vaccine/dose size. |
| Sample of data quality checking for vaccine route. |
| Evaluation Criteria |
| The EMR prevents the user from entering "Intramuscular" as a route for the nasal live, attenuated influenza vaccine. |
| Notes for Testers |
| No Note |

2.3.6. Record Influenza Vaccine administration

Test Step Type: SUT_MANUAL

The provider documents in the EMR all attributes associated with the new vaccine administration.

Test Story

| | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|---------------|-------------------|-------------|-----------------------|----------------------|---------------------------------------------------------|-------------------------------------|-----------------------------|-------------------------------------------------------------------------------------------------------------------|--------------------------------------|--------------|----------------------|-------------------------------------------------------------------------------------------------------------------|----------------------------------|-----|---------------------------------|----|------------------------|---------------|--------------------------|-------------------------------------------------|------------|----------|---------------------------|------------|-----------------------------|-------------------------|-------------------|----|-------------------------|-----------------------------------------|---------------------|--|-----------------|----|
| Description | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| The nurse administers the nasal live, attenuated influenza vaccine • Documents all required information for each vaccine | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Comments | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| No Comments | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Pre Condition | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Order is placed for nasal live, attenuated influenza vaccine. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Post Condition | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| The nasal live, attenuated influenza vaccinations is recorded in the EMR. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Test Objectives | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Record Vaccine Administration: The EHR or other clinical software system records information about each vaccine administered. The EHR records this information as structured data elements, including, at a minimum: date administered, administering clinician, site of administration (e.g., left arm), immunization type, product, lot number, manufacturer, Vaccine Information Statement date, and quantity of vaccine/dose size. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Evaluation Criteria | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| EMR Records the following vaccine administration information: | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <table border="1"><tr><td>Entered BY</td><td>Sandra Molina</td></tr><tr><td>Ordering Provider</td><td>Frank Smith</td></tr><tr><td>Entering Organization</td><td>Shoreline Pediatrics</td></tr><tr><td>Vaccine Event information source (Administration Notes)</td><td>New immunization record (NIP001 00)</td></tr><tr><td>Value/Text for Vaccine Type</td><td>influenza virus vaccine, live, attenuated, for intranasal use (CVX 111), FluMist Quadrivalent (NDC 66019-0301-10)</td></tr><tr><td>Date/Time of Start of Administration</td><td>Current Date</td></tr><tr><td>Vaccine Administered</td><td>influenza virus vaccine, live, attenuated, for intranasal use (CVX 111), FluMist Quadrivalent (NDC 66019-0301-10)</td></tr><tr><td>Administered Amount (of Vaccine)</td><td>0.2</td></tr><tr><td>Administered Units (of Measure)</td><td>mL</td></tr><tr><td>Administering Provider</td><td>Sandra Molina</td></tr><tr><td>Administered-at Location</td><td>400 Shoreline Drive, Stamford Connecticut 06901</td></tr><tr><td>Lot Number</td><td>8L4B3521</td></tr><tr><td>Substance Expiration Date</td><td>10/31/2016</td></tr><tr><td>Substance Manufacturer Name</td><td>MedImmune,LLC (MVX MED)</td></tr><tr><td>Completion Status</td><td>CP</td></tr><tr><td>Route of Administration</td><td>Nasal (NCIT C38284), Nasal (HL70162 NS)</td></tr><tr><td>Administration Site</td><td></td></tr><tr><td>VFC Eligibility</td><td>No</td></tr></table> | Entered BY | Sandra Molina | Ordering Provider | Frank Smith | Entering Organization | Shoreline Pediatrics | Vaccine Event information source (Administration Notes) | New immunization record (NIP001 00) | Value/Text for Vaccine Type | influenza virus vaccine, live, attenuated, for intranasal use (CVX 111), FluMist Quadrivalent (NDC 66019-0301-10) | Date/Time of Start of Administration | Current Date | Vaccine Administered | influenza virus vaccine, live, attenuated, for intranasal use (CVX 111), FluMist Quadrivalent (NDC 66019-0301-10) | Administered Amount (of Vaccine) | 0.2 | Administered Units (of Measure) | mL | Administering Provider | Sandra Molina | Administered-at Location | 400 Shoreline Drive, Stamford Connecticut 06901 | Lot Number | 8L4B3521 | Substance Expiration Date | 10/31/2016 | Substance Manufacturer Name | MedImmune,LLC (MVX MED) | Completion Status | CP | Route of Administration | Nasal (NCIT C38284), Nasal (HL70162 NS) | Administration Site | | VFC Eligibility | No |

2.3.7. Records MMRV Vaccine administration route with data validation checking

Test Step Type: SUT MANUAL

The provider records the vaccine administration route in the EMR and is prevented from incorrectly documenting vaccine route

Test Story

| |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description |
| The nurse documents administration route for the MMRV vaccine • Is prevented from documenting "oral" for MMRV vaccine |
| Comments |
| This step covers data quality checking as an informative aspect of vaccine administration |
| Pre Condition |
| Order is placed for MMRV vaccine. |
| Post Condition |
| The MMRV vaccination route has failed to be recorded as "oral" in the EMR. |
| Test Objectives |
| Record Vaccine Administration: The EHR or other clinical software system records information about each vaccine administered. The EHR records this information as structured data elements, including, at a minimum: date administered, administering clinician, site of administration (e.g., left arm), immunization type, product, lot number, manufacturer, Vaccine Information Statement date, and quantity of vaccine/dose size. |
| Sample of data quality checking for vaccine route. |
| Evaluation Criteria |
| The EMR prevents the user for entering "Oral" as a route for the MMRV vaccine. |
| Notes for Testers |
| No Note |

2.3.8. Record MMRV Vaccine administration

Test Step Type: SUT_MANUAL

The provider documents in the EMR all attributes associated with the new vaccine administration.

Test Story

| | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

2.4. Juana Mariana Gonzales Transmit Immunization Report

Send the Immunization Report to the Immunization Registry (VXU/Z22) for Juana Mariana Gonzales.

Test Story

Description

Following the vaccinations given during the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. The Vaccination report includes all newly administered vaccines. The report should include vaccines incorrectly recorded in the IIS. The report MAY send the immunizations that the EMR imported from the IIS.

Comments

The Report must include all newly administered vaccines in any order. the report may also include the corrected information where the EMR has different information than the IIS, and may also include the information imported from the IIS.

Pre Condition

The vaccines for the visit have been administered.

Post Condition

No PostCondition

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's immunization history to public health immunization registries.

Evaluation Criteria

No evaluation criteria

Notes for Testers

No Note

2.4.1. Transmit the immunization report to the Immunization Registry

Test Step Type: SUT_INITIATOR

The EMR send the Immunization Report to the Immunization Registry (VXU/Z22) for updated vaccination information from the visit. This includes all newly administered vaccines and may include historical information updated in the EMR during the visit.

Test Story

Description

Following the vaccinations given during the visit, the EMR transmits an Immunization report to the Immunization Registry using the VXU/Z22. The Vaccination report includes all newly administered vaccines. The report should include vaccines incorrectly recorded in the IIS. The report MAY send the immunizations that the EMR imported from the IIS.

Comments

The Report must include all newly administered vaccines in any order. the report may also include the corrected information where the EMR has different information than the IIS, and may also include the information imported from the IIS.

Pre Condition

The vaccines for the visit have been administered.

Post Condition

The Immunization Report has been transmitted to the IIS using a valid Z22 VXU in accordance with the test data correctly and without omission.

Test Objectives

Transmit Standard Patient Immunization History Report: The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's immunization history to public health immunization registries.

Evaluation Criteria

The VXU/Z22 message passes validation using the NIST Immunization VXU Validation Tool (Z22) (context-free). The content of the message correctly reflects the test data (context-based) in accordance with the Test Data Specification and the Message Content.

Notes for Testers

Test Data Specification
Patient Information

| Element | Data |
|--------------------------|-----------------------------------------|
| Patient Name | Juana Mariana Gonzales |
| Mother's Maiden Name | Maria Acosta |
| ID Number | 123456 987633 |
| Date/Time of Birth | 11/01/2010 11:05 |
| Administrative Sex | Female |
| Patient Address 1 | 4345 Standish Way Stamford CT 06903 USA |
| Patient Address 2 | 325 Shorline Drive Stamford CT 06901 |
| Local Number | (203)555-1212 |
| Race | White |
| Ethnic Group | Hispanic or Latino |
| Multiple Birth Indicator | No |
| Birth Order | |

Immunization Registry Information

| Element | Data |
|---------------------------------------------|------------------------------|
| Immunization Registry Status | Active |
| Immunization Registry Status Effective Date | 07/01/2012 |
| Publicity Code | Reminder/Recall - any method |
| Publicity Code Effective Date | 07/01/2012 |
| Protection Indicator | |
| Protection Indicator Effective Date | |

Guardian or Responsible Party

| Element | Data |
|--------------|-------------------------------------|
| Name | Joanna Merida Gonzales |
| Relationship | Grandparent |
| Address | 4345 Standish Way Stamford CT 06901 |
| Phone Number | (203)555-1212 |

Vaccine Administration Information[*]**Vaccine Administration Information**

| Element | Data |
|------------------------------------|---------------------------------------------------------------|
| Administered Vaccine | hepatitis B vaccine, pediatric or pediatric/adolescent dosage |
| Date/Time Start of Administration | 11/01/2010 |
| Administered Amount | 999 |
| Administered Units | |
| Administration Notes | Historical information - from public agency |
| Administering Provider | Lisa Sirtis |
| Substance Lot Number | 6332FK33 |
| Substance Expiration Date | 12/14/2011 |
| Substance Manufacturer Name | GlaxoSmithKline Biologicals SA |
| Substance/Treatment Refusal Reason | |
| Completion Status | Complete |
| Action Code | Add |
| Route | IM |
| Administration Site | Left Thigh |
| Entering Organization | Shoreline Hospital |
| Entered By | Lisa Sirtis |
| Ordered By | Jane Carter |

Vaccine Administration Information

| Element | Data |
|------------------------------------|----------------------------------------------|
| Administered Vaccine | hepatitis B vaccine, unspecified formulation |
| Date/Time Start of Administration | 12/20/2010 |
| Administered Amount | 999 |
| Administered Units | |
| Administration Notes | Historical Immunization |
| Administering Provider | Sandra Molina |
| Substance Lot Number | 6352FK1 |
| Substance Expiration Date | 12/14/2011 |

2.4.2. Record an adverse reaction

Test Step Type: SUT MANUAL

The Provider records in the EMR an adverse reaction of persistent, inconsolable crying lasting > 3 hours within 48 hours of dose.

Test Story

| |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description |
| Following the vaccine administration, the patient's mother reports that the patient that evening had persistent, inconsolable crying lasting > 3 hours. |
| Comments |
| No Comments |
| Pre Condition |
| The vaccinations for the visit have been administered. |
| Post Condition |
| The adverse reaction to the MMRV of persistent, inconsolable crying lasting > 3 hours within 48 hours of dose is recorded in the EMR. |
| Test Objectives |
| <i>Identify Adverse Event:</i> The EHR or other clinical software system enables capture of structured data regarding adverse events. |
| Evaluation Criteria |
| Verify that vendor can record the adverse reaction of persistent, inconsolable crying lasting > 3 hours within 48 hours of dose correctly and without omission |
| Notes for Testers |
| No Note |

2.4.3. Transmit the updated vaccination report with adverse reaction to the registry

Test Step Type: SUT_INITIATOR

The EMR generates a Z22 Send Unsolicited Immunization Update Using a VXU correctly and without omission according to supplied test data.

Test Story

| |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description |
| The adverse reaction to the MMRV of persistent, inconsolable crying lasting > 3 hours within 48 hours of dose is reported to the Immunization Registry using a Z22/VXU message. |
| Comments |
| No Comments |
| Pre Condition |
| An adverse reaction to the MMRV of persistent, inconsolable crying lasting > 3 hours within 48 hours of dose is recorded in the EMR. |
| Post Condition |
| The adverse reaction has been transmitted to the IIS. |
| Test Objectives |
| <i>Transmit Standard Patient Immunization History Report:</i> The EHR or other clinical software system directly or indirectly through an intermediary creates and transmits a report of a patient's immunization history to public health immunization registries. |
| Evaluation Criteria |
| The VXU/Z22 message passes validation using the NIST Immunization VXU Validation Tool (Z22) (context-free). The content of the message correctly reflects the test data (context-based) in accordance with the Test Data Specification and the Message Content. |
| Notes for Testers |
| No Note |
